# PayGate Invoice

Platform for MobilePay Invoice

## What is MobilePay Invoice

MobilePay Invoice is a payment method that your customers can use for paying the invoices you send to them.

The consumers make payments from their MobilePay app without any unnecessary hassle.

Click on the play button above to watch the video or [click here](#)

## How it works?

1. The merchant creates an invoice in PayGate Invoice platform (or in custom integration)
2. Request for invoice is then sent to MobilePay
3. MobilePay validate the invoice data, incl. validation of the consumer's name against the CPR registry.
4. Consumer receives a push notification on his mobile device through his MobilePay app.
5. Consumer reviews the invoice and accepts/rejects it.
6. Invoice status update is sent from MobilePay back to PayGate Invoice

## What are the benefits of PayGate Invoice

- Easy and quick creation of invoices
- Sending invoices with the click of a button
- Maintain list of customers
- API access
- Real-time status tracking of invoices
- Improved cash flow
- Simple invoice acceptance with a single swipe
- Low transaction prices

## Features

- Customers management
- Invoice creation
- Bulk invoice creation with XML import
- Bulk invoice creation with CSV import
- Filtering
- Validation of invoice data
- Validation error logs
- Visual reports with charts in Google Data Studio or other data visualisation tools
- API

The screenshot displays the 'INVOICES' section of the PayGate application. The interface includes a sidebar with navigation options: Customers, Invoices (selected), Import, and Log Out. The main content area shows a table of invoices with the following columns: Invoice ID, Invoice Number, Name, and Phone. A circular callout highlights the 'Status' and 'Created at' columns, showing the following data:

Status	Created at
Paid	20.05.2019 15:05
Accepted	20.05.2019 11:05
Rejected	16.05.2019 13:05
Rejected	15.05.2019 12:05
Rejected	15.05.2019 12:05
Rejected	15.05.2019 12:05

The interface also includes a search bar, filters for 'From' and 'To' dates, and a status filter set to 'All'. There are buttons for 'Export to excel' and 'Start Payment Agreement'. The bottom of the interface shows pagination controls: First, Prev, 1, 2, Next, Last.

## PayGate Invoice API

Our REST API in development will expose the following actions:

- Customers
  - Get all customers
  - Get single customer details (incl. nested invoices list)
  - Create customer
  - Edit customer
  - Create invoice on selected customer
- Invoices
  - Get all invoices
  - Get single invoice details
  - Create invoice
- Import
  - Create invoices in bulk by supplying them in json format

The screenshot displays the 'IMPORT' section of the PayGate web application. The page title is 'IMPORT Import (#1)'. There is a navigation menu on the left with options for 'Customer', 'Invoice', 'Import', and 'Log'. The main content area is divided into two tabs: 'INVOICES' (selected) and 'VALIDATION REPORT'. A table of invoices is shown with columns for 'Phone', 'Total amount', 'Due date', 'Status', 'Created at', and 'Updated at'. A circular callout highlights the 'INVOICES' table, which has columns for 'Invoice ID' and 'Invoice Number'. The table contains 10 rows of data.

Invoice ID	Invoice Number	Total amount	Due date	Status	Created at	Updated at
		0 kr.	2019-03-16	Rejected	2019-03-15 12:35:20	2019-03-15 12:37:12
		0 kr.	2019-03-16	Invalid	2019-03-15 12:39:27	2019-03-15 12:39:42
1	00001	0 kr.	2019-03-16	Rejected	2019-03-15 12:40:54	2019-03-15 12:42:42

## Easy onboarding

Onboarding on PayGate Invoice is an extremely easy process, where you only need to do a few things:

1. Have an agreement signed with MobilePay and MobilePay Invoice activated as a product
2. Authorize our platform to connect with your MobilePay account

Provided that you already have an agreement with MobilePay in place, the above onboarding process happens in a matter of minutes.

You can use our platform for whatever time you like and you can cancel your account at ANY time, if you should wish to do so.

## Data visualisation

One of the best features of our platform is that we have a lot of support for data visualisation.

You are not limited to just numbers and tables. We go one step further and provide you with a comprehensive Google Data Studio report filled with charts for all the important tracking that you need to do.

If needed, these reports can also be extended to other data visualisation tools.
